2.3	Tab on "More Details" button	The application displays the user all my orders successfully	Ready to Test		
3	Verify that the status "All" is working				
3.1	Tab on the "My account" Page	A list of icons displays successully and one of them is "My orders" below "Address Book"	Ready to Test	High	
3.2	Tab on "My Orders"" icon	The application redirects the user to All my orders successfully and the default is All orders	Ready to Test		
3.3	Tab on "More Details" button	The application displays the user all my orders successfully	Ready to Test		
4	Verify that the status "unpaid" is working				
4.1	Tab on the "My account" Page	A list of icons displays successully and one of them is "My orders" below "Address Book"	Ready to Test	High	
4.2	Tab on "My Orders"" icon	The application redirects the user to All my orders successfully and the default is All orders	Ready to Test		
4.3	Tab on "unpaid" button	The application displays the user all my orders that I do not paid only successfully	Ready to Test		
5	Verify that the status "Processed" is working				
5.1	Tab on the "My account" Page	A list of icons displays successully and one of them is "My orders" below "Address Book"	Ready to Test	High	
5.2	Tab on "My Orders"" icon	The application redirects the user to All my orders successfully and the default is All orders	Ready to Test		
5.3	Tab on "Processed" button	The application displays the user all my orders that under processing only successfully	Ready to Test		

<b>6</b>	<b>Verify that the status "Shipped" is working</b>				
6.1	Tab on the "My account" Page	A list of icons displays successfully and one of them is "My orders" below "Address Book"	Ready to Test	High	
6.2	Tab on "My Orders" icon	The application redirects the user to All my orders successfully and the default is All orders	Ready to Test		
6.3	Tab on "Shipped" button	The application displays the user all my orders that shipped only successfully	Ready to Test		
<b>7</b>	<b>Verify that the status "On Hold" is working</b>				
7.1	Tab on the "My account" Page	A list of icons displays successfully and one of them is "My orders" below "Address Book"	Ready to Test	High	
7.2	Tab on "My Orders" icon	The application redirects the user to All my orders successfully and the default is All orders	Ready to Test		
7.3	Tab on "On Hold" button	The application displays the user all my orders that On Hold only successfully	Ready to Test		
<b>8</b>	<b>Verify that the status "Canceled" is working</b>				
8.1	Tab on the "My account" Page	A list of icons displays successfully and one of them is "My orders" below "Address Book"	Ready to Test	High	
8.2	Tab on "My Orders" icon	The application redirects the user to All my orders successfully and the default is All orders	Ready to Test		
8.3	Tab on "Canceled" button	The application displays the user all my orders that I canceled only successfully	Ready to Test		
<b>9</b>	<b>Verify that order details is all clear and as designed</b>				
9.1	Tab on the "My account" Page	A list of icons displays successfully and one of them is "My orders" below "Address Book"	Ready to Test	Low	
9.2	Tab on "My Orders" icon	The application redirects the user to All my orders successfully and the default is All orders	Ready to Test		
9.3	Tab on any order	The application displays the user all details of the order successfully like { Order's ID Ø Date at which the order was made Ø The Status of the order Ø The Order's total price . Ø A Re-order Button	Ready to Test		
<b>10</b>	<b>Verify that each order the first 2 items for that order are displayed and each item is displaying details</b>				
10.1	Tab on the "My account" Page	A list of icons displays successfully and one of them is "My orders" below "Address Book"	Ready to Test		
10.2	Tab on "My Orders" icon	The application redirects the user to All my orders successfully and the default is All orders	Ready to Test		

10.3	Tab on any order	The application displays the user all details of the order successfully and the first two items displays some details like {Ø Item name. Ø Total price Ø Quantity Ø A more button	Ready to Test	Low	
11	<b>Verify that The reorder button is working and I could re-order the item again</b>				
11.1	Tab on the "My account" Page	A list of icons displays successfully and one of them is "My orders" below "Address Book"	Ready to Test	High	
11.2	Tab on "My Orders"" icon	The application redirects the user to All my orders successfully and the default is All orders	Ready to Test		
11.3	Tab on any order	The application displays the user all details of the order successfully and the "more" button and "Re-order" button is displayed also	Ready to Test		
11.4	Tab on "Re-order" button	The button worked well and the item ordered successfully	Ready to Test		
12	<b>Verify that the "Total price" at the bottom of the order</b>				
12.1	Tab on the "My account" Page	A list of icons displays successfully and one of them is "My orders" below "Address Book"	Ready to Test	High	
12.2	Tab on "My Orders"" icon	The application redirects the user to All my orders successfully and the default is All orders	Ready to Test		
12.3	Tab on any order	The application displays the user the total price of the order successfully	Ready to Test		
13	<b>Verify the "Reorder" Button is exist at the bottom of the order {If Reorder button should be hidden in case the order either contains an out of stock product or contains a "Gift certificate" item}</b>				
13.1	Tab on the "My account" Page	A list of icons displays successfully and one of them is "My orders" below "Address Book"	Ready to Test	Medium	
13.2	Tab on "My Orders"" icon	The application redirects the user to All my orders successfully and the default is All orders	Ready to Test		
13.3	Tab on any order	The application displays the user the "Re-Order" button of the order successfully	Ready to Test		
14	<b>Verify the "More" button is exists as designed after two items of the order</b>				
14.1	Tab on the "My account" Page	A list of icons displays successfully and one of them is "My orders" below "Address Book"	Ready to Test	Low	
14.2	Tab on "My Orders"" icon	The application redirects the user to All my orders successfully and the default is All orders	Ready to Test		

14.3	Tab on any order	The application displays the user the "More" button of the order after two items successfully	Ready to Test		
15	Verify that the "More" button is working well and all details displayed after tabbing on the button				
15.1	Tab on the "My account" Page	A list of icons displays successfully and one of them is "My orders" below "Address Book"	Ready to Test	Medium	
15.2	Tab on "My Orders"" icon	The application redirects the user to All my orders successfully and the default is All orders	Ready to Test		
15.3	Tab on any order	The application displays the user all details of the order successfully and the first two items displays some details like {Ø Item name. Ø Total price Ø Quantity Ø A more button	Ready to Test		
15.4	Tab on "More" button	The application redirected the user to the full list of the items if the user had more than two items in the order	Ready to Test		
Verify invalid functions and data using WiFi on the mobie application					
1	Verify that the icon button of "My Account" is not working				
1.1	Tab on the "My account" Page	The button and the function did not working and the application crashed and pushed me out	Ready to Test	High	
1.2	Tab on the application again	The application pushes the user out and asked the user to login again	Ready to Test		
2	Verify that the icon button of "My orders" is not working				
2.1	Tab on the "My account" Page	A list of icons displays successfully and one of them is "My orders" below "Address Book"	Ready to Test	High
